

housing features

CBC's line of outdoor housings provides an attractive, compact solution for indoor or outdoor camera installations. The housing design incorporates a unique slide-off feature allowing full accessibility to the camera and lens even after installation. In addition, both wall and ceiling brackets offer feed-through wiring which fully conceals all cabling. The housings are available with an optional heater and a sunshield is available for high temperature environments.

Compact housing (only 11" long) accommodates all GANZ FC/YC cameras with any computer varifocal lens, including the 5-50mm

Slide-off cover for full accessibility

Heater option maintains proper temperatures and minimizes fogging and humidity

New swivel mount can be tilted down a full 90°

Feed through wall (or ceiling) bracket conceals cables for a clean professional appearance

Optional sunshield (Model SS-1) for high temperature environments

Optional ceiling bracket (Model JB1)

Optional pole-mount adapter (Model PMA-1)
